# Basel III – Market Discipline Disclosure Requirement Under Pillar III

## CAPITAL ADEQUACY

Capital adequacy is one of the key financial indicators which illustrate the soundness and the stability of a bank. This measures banks ability to withstand in an unexpected loss scenarios during various activities carried out by the bank.

Basel committee on Bank supervision (BCBS) has implemented set of stringent measures of capital, liquidity and funding reforms. Accordingly BASEL III accord was issued in December 2010 and it has come into force and effect in Sri Lanka on July 1, 2017 based on the Central bank direction 01 of 2016 on capital requirement under BASEL III for licensed commercial banks. This replaces Basel II reforms which were in force and effect in Sri Lanka since January 1, 2008 onwards.

Commencing from 01st July 2017, with the amendment thereto under Direction no 11 of 2019 on Domestically Systemically Important Banks (D-SIBS) dated 20th December 2019; Bank has to maintain the Capital in 3 tiers as mentioned below

Accordingly minimum capital requirement of the bank are as follows.

	Minimum Requirement
- Common Equity Tier I Capital Ratio (CET I)	8.00%
- Total Tier I Capital Ratio (CET I+ AT I)	9.50%
- Total Capital Ratio	13.50%

Common Equity Tier I (CET I) is mainly comprised of equity capital, other capital and retained earnings. CET I is the highest quality capital and effective capital in absorbing losses.

Additional Tier I (AT 1) capital includes capital instruments other than the instruments included in CET I capital.

Total capital is comprised of Tier I plus other qualifying capital instruments (i.e. such as subordinated debentures subject to regulatory deductions, revaluation reserves on property plant and equipment with a cap of up to 50% and general loan loss provision)

BASEL III has introduced new capital buffers and all banks are required to hold additional capital buffers over and above the minimum CET I and Total Capital Adequacy levels stipulated above.

- Capital Conservation Buffer
- High Loss Absorbency (HLA) requirement on Domestically Significant Banks (D-SIBs)
- Counter Cyclical Buffer

Three pillars introduced by BASEL II is continued to be applied in the BASEL III framework is mentioned below.

- Pillar I - Minimum capital requirements
- Pillar II - Supervisory Review Process
- Pillar III - Market Discipline

### Pillar I - Minimum Capital Requirement

Minimum Capital Requirement shall maintain as a percentage of Risk Weighted Assets (RWAs) and bank calculated its RWAs based on following approaches.

- The Standardized Approach for Credit Risk
- The Standardized Measurement Method for Market Risk
- The Basic Indicator Approach for Operational Risk

### Pillar II – Supervisory Review Process (SRP)

SRP framework assesses the bank's capital adequacy and determining whether bank is maintaining additional capital to cover its risks. Bank has developed an ICAAP (Internal Capital Adequacy Assessment Process) framework in this regard, which closely indicates risks and capital assessment processes to support the Bank's current and projected demand for capital under unexpected and stressed conditions.

### Pillar III – Market Discipline

Pillar III aims to provide consistent and comprehensive disclosure framework which enhances the comparability between banks. It requires number of disclosure requirements to give better understanding of capital adequacy to external share holders by providing an insight into the internal computation procedures followed by the bank.

Accordingly disclosures required to be published as per the Central Bank Direction 01 of 2016 are set out below.
